e-Mail [toxtech@att.net](mailto:toxtech@att.net)

Dear New U.S. Customer:

Unfortunately, Staphylococcal Enterotoxins, TSST-1 and the Shiga Toxins are on the Select Agents list covered in 42 CFR 73. Fortunately, most of you do not have to have a CDC registration to use these toxins for your research. However, for us to be able to sell them to you, you must sign off to that effect by sending us an Intended Use Declaration (IUD). For your convenience, we have drafted the IUD and it is available for your downloading here. Before or at the time you place your 1<sup>st</sup> order please download the letter, transfer it to Your Institution's Letterhead, sign it and send or fax it to us. We must have it prior to shipping your first toxin order.

Thank you,

Raoul,  
For ToxTech
